

Tamires Lelis

DESIGN ENGINEER/PRODUCT DESIGNER

Belo Horizonte, Brazil

Portfolio: www.tamireslelis.com

Linkedin: linkedin.com/in/tamireslelis

Email: tamiresslelis@gmail.com

Design Engineer and Product Designer with 8+ years of experience designing scalable digital products across healthtech, fintech, SaaS, marketplaces, and enterprise systems. Worked with companies including Insense, rready, BeCareLink, Itaú Unibanco, Accenture, Unisys, and CAIXA.

Proven track record improving activation, conversion, retention, and operational efficiency through UX strategy, data-informed design, AI-driven solutions, and close collaboration with Product and Engineering. Experienced across the full product lifecycle, from discovery and validation to scalable systems and post-launch optimization.

PRODUCT IMPACT

- BeCareLink — Healthtech Member Experience: Led end-to-end product design as the first and sole designer, shaping onboarding, engagement, referrals, and feedback loops that helped grow active users from 1,900 to 6,200 in 12 months (+226.32%)
- Insense — Creator Onboarding: Reduced onboarding drop-off from 32% to 18% and increased activation by +14% by redesigning the onboarding flow and improving guidance across the creator journey
- Insense — Campaign Applications: Designed “Use Previous Answers,” a reusable input feature that reduced repetitive work for creators applying to multiple campaigns, driving 200K+ reused answers with a 90%+ completion rate
- rready — AI & Systems: Designed AI agent configuration, prompt architecture, dynamic fields, markdown editor, global tables, cards, and event-driven system interfaces
- Unisys / CAIXA — Enterprise B2B: Improved CIWEB, a real estate credit system used by 86,400+ CAIXA employees, reducing confusion and internal support dependency

EXPERTISE

Design Engineering, Product Design, Healthtech, SaaS, Marketplace, Fintech, AI Integration, UX Strategy, Product Discovery, Design Systems, Data-Informed Design, Conversion Optimization, User Research, Prototyping, Front-End Thinking, Product & Engineering, Scalable Product Systems, Complex Digital Platforms

TOOLS

Cursor, Claude code, GitHub Copilot, v0, Amplitude, Figma

WORK EXPERIENCE

Insense (Sep/24 - Mar/26) - Product Designer - SaaS

Drive end-to-end UX across web and mobile for a dual-sided marketplace platform, translating business requirements into scalable interaction systems.

- Led the redesign of creator onboarding, improving guidance across the user journey and increasing activation by +14%.
- Improved campaign application flows by introducing reusable input logic, reducing repetitive work for creators applying to multiple campaigns.
- Redesigned social account connection flows with clearer CTAs, value communication, and flexible user control.
- Designed and implemented an AI-assisted content review system using Gemini API to evaluate creator submissions against campaign briefs.

Rready (Nov/25 - Feb/26) - Product Designer (AI & Systems)

Designed and structured AI-driven and system-level features, operating at the intersection of product design and engineering.

- Led the design of Rready AI, defining AI agent creation, configuration, prompt architecture, and workflow integration.
- Designed scalable systems using JSON-based schemas, dynamic fields, and reusable UI patterns.
- Translated backend complexity, including Kafka pipelines and webhooks, into clear user-facing configurations.
- Developed a comprehensive design playbook introducing robust practices and processes, whilst cultivating a creative design culture that encouraged boundary-pushing innovation and strategic decision-making.
- Partnered closely with the founder and engineers to improve platform architecture, usability, and implementation feasibility.

BeCareLink (Feb/21 - Sep/24) - Product Designer - B2C

Led product design as the first and sole designer, owning design strategy and end-to-end execution across internal and external products.

- Increased user retention from 1,900 to 6,200 active users (226.32% growth) within a 12-month period.
- Improved Google Play ratings for BeCare MS by 9.76% through UX enhancements and user feedback optimization.
- Defined product requirements, specifications, and user stories, supporting go-to-market execution.
- Built and scaled a Design Library that accelerated workflows and enabled the launch of BeCare Camp Lejeune in 3 months.
- Designed onboarding email strategy (HTML/CSS) and implemented growth loops, including referrals, community-building, in-app invitations, and feedback systems.

Itáu (Jun/21 - May/22) - Product Designer - B2B/B2C

Drove end-to-end UX initiatives within Itaú Corporate, designing high-impact financial journeys inside Itaú Unibanco's ecosystem serving 66 million global clients, including Itaú BBA.

- Redesigned the foreign currency journey (send, request, withdraw), aligning mobile experience with Itaú Bankline desktop benchmarks to drive transaction growth.
- Conducted in-depth discovery (user interviews and competitive analysis) to identify friction points across cross-border transaction flows.
- Applied BDD-style behavioral scenarios to define user states, edge cases, and acceptance criteria, reducing ambiguity across Product, Engineering, and QA.
- Collaborated closely with engineering to ensure technical feasibility in a regulated financial environment and validated solutions through usability testing.

- Structured improvements based on transaction-focused KPIs (North Star metric), supporting performance alignment across digital channels.

Accenture (Jun/21 - May/22) - Product Designer - B2B/B2C

Delivered product design solutions for Bank of Communications (BOCOM BBM) within a high-volume, legacy banking architecture operating under regulatory constraints.

- Designed banking workflows for BOCOM BBM within a regulated, legacy financial ecosystem.
- Translated complex business rules into clear user flows, edge cases, and acceptance criteria.
- Delivered high-fidelity prototypes and developer-ready specifications for Agile delivery.

Unisys (Dec/18 - Dec/19) - UX/UI Designer - B2B

Worked on CIWEB (Real Estate Credit System), a large-scale B2B platform used by 86,400+ employees at CAIXA Econômica Federal.

- Designed and improved large-scale B2B systems across construction and banking sectors.
- Led UX improvements for CIWEB (CAIXA Econômica Federal), a platform used by 86,400+ employees, reducing user confusion and internal support dependency.
- Improved the user experience of Portal das Construtoras, a B2B platform serving 3,000+ construction companies.

EDUCATION/COURSES

- **Bachelor of Computer Engineering** (2011 -2017) - Federal Center for Technological Education of Minas Gerais
- **Kanban System Design (KPM I)** - Kanban University
