

Tamires Lelis

PRODUCT DESIGNER/DESIGN ENGINEER

Belo Horizonte, Brazil

Portfolio: www.tamireslelis.com
Linkedin: linkedin.com/in/tamireslelis
Email: tamiresslelis@gmail.com

With over 8 years of experience as a Product Designer in both B2B and B2C environments, I focus on crafting human-centered experiences through expertise in end-to-end design processes and delivering high-quality, high-fidelity designs. I have extensive experience in fintech, having worked with two of the largest banks in Latin America, Itaú Unibanco S.A. and CAIXA, as well as with startups that required design systems to scale design operations and launch products quickly and consistently. Recently, I have been using Claude Code and GitHub to build design solutions and manage version control.

PRODUCT IMPACT

- BeCareLink — Healthtech: Led end-to-end product design as the first and sole designer for the BeCare MS Link platform, redesigning core workflows and feedback loops that contributed to active user growth from 1,900 to 6,200 in 12 months (+226%)
- Insense — Creator Onboarding: Reduced onboarding drop-off from 32% to 18% and increased activation by +14% by redesigning the onboarding flow and improving guidance across the creator journey
- Insense — Campaign Applications: Designed “Use Previous Answers,” a reusable input feature that reduced repetitive work for creators applying to multiple campaigns, driving 200K+ reused answers with a 90%+ completion rate
- rready — AI & Systems: Designed AI agent configuration, prompt architecture, dynamic fields, markdown editor, global tables, cards, and event-driven system interfaces
- Unisys / CAIXA — Enterprise B2B: Improved CIWEB, a real estate credit system used by 86,400+ CAIXA employees, reducing confusion and internal support dependency

EXPERTISE

Platform Product Design, Internal Tools, Complex Systems Design, Data-Heavy Interfaces, AI Workflows, Fintech, Enterprise SaaS, Design Systems, Backend-Driven UX, Workflow Architecture, Operational UX, Product Discovery, UX Strategy, Scalable UI Patterns, Tables & Dense Interfaces, Product & Engineering Collaboration

TOOLS

Cursor, Claude Code, GitHub Copilot, v0, Amplitude, Figma

WORK EXPERIENCE

Insense (Sep/24 - Mar/26) - Product Designer - SaaS

Drive end-to-end UX across web and mobile for a dual-sided marketplace platform, translating business requirements into scalable interaction systems.

- Led the redesign of creator onboarding, improving guidance across the user journey and increasing activation by +14%.

- Improved campaign application flows by introducing reusable input logic, reducing repetitive work for creators applying to multiple campaigns.
- Redesigned social account connection flows with clearer CTAs, value communication, and flexible user control.
- Designed and implemented an AI-assisted content review system using Gemini API to evaluate creator submissions against campaign briefs.

Rready (Nov/25 - Feb/26) - Product Designer freelancer (AI & Systems)

Designed AI-native and system-level product experiences for an enterprise innovation platform, translating backend complexity into scalable, user-facing workflows.

- Led the design of rready AI, defining AI agent creation, configuration, prompt architecture, and workflow integration.
- Applied my Computer Engineering background to translate JSON schemas, dynamic fields, API behavior, Kafka pipelines, and webhooks into clear UX/UI configurations.
- Designed scalable UI systems, including reusable global tables, cards, markdown editor patterns, and dynamic field components.
- Structured AI interaction models, including pre-prompts, multi-language behavior, and workflow-specific AI responses.
- Partnered closely with the founder and engineers to challenge assumptions, improve platform architecture, and align product decisions with technical feasibility.

BeCareLink (Feb/21 - Sep/24) - Product Designer - B2C

Led product design as the first and sole designer, owning design strategy and end-to-end execution across internal and external products.

- Increased user retention from 1,900 to 6,200 active users (226.32% growth) within a 12-month period.
- Improved Google Play ratings for BeCare MS by 9.76% through UX enhancements and user feedback optimization.
- Defined product requirements, specifications, and user stories, supporting go-to-market execution.
- Built and scaled a Design Library that accelerated workflows and enabled the launch of BeCare Camp Lejeune in 3 months.
- Designed onboarding email strategy (HTML/CSS) and implemented growth loops, including referrals, community-building, in-app invitations, and feedback systems.

Itaú (Jun/21 - May/22) - Product Designer - B2B/B2C

Drove end-to-end UX initiatives within Itaú Corporate, designing high-impact financial journeys inside Itaú Unibanco's ecosystem serving 66 million global clients, including Itaú BBA.

- Redesigned the foreign currency journey (send, request, withdraw), aligning mobile experience with Itaú Bankline desktop benchmarks to drive transaction growth.
- Conducted in-depth discovery (user interviews and competitive analysis) to identify friction points across cross-border transaction flows.
- Applied BDD-style behavioral scenarios to define user states, edge cases, and acceptance criteria, reducing ambiguity across Product, Engineering, and QA.
- Collaborated closely with engineering to ensure technical feasibility in a regulated financial environment and validated solutions through usability testing.
- Structured improvements based on transaction-focused KPIs (North Star metric), supporting performance alignment across digital channels.

Accenture (Jun/21 - May/22) - Product Designer - B2B/B2C

Delivered product design solutions for Bank of Communications (BOCOM BBM) within a high-volume, legacy banking architecture operating under regulatory constraints.

- Designed banking workflows for BOCOM BBM within a regulated, legacy financial ecosystem.
- Translated complex business rules into clear user flows, edge cases, and acceptance criteria.
- Delivered high-fidelity prototypes and developer-ready specifications for Agile delivery.

Unisys (Dec/18 - Dec/19) - UX/UI Designer - B2B

Worked on CIWEB (Real Estate Credit System), a large-scale B2B platform used by 86,400+ employees at CAIXA Econômica Federal.

- Designed and improved large-scale B2B systems across construction and banking sectors.
- Led UX improvements for CIWEB (CAIXA Econômica Federal), a platform used by 86,400+ employees, reducing user confusion and internal support dependency.
- Improved the user experience of Portal das Construtoras, a B2B platform serving 3,000+ construction companies.

EDUCATION/COURSES

- **Bachelor of Computer Engineering** (2011 -2017) - Federal Center for Technological Education of Minas Gerais
- **Kanban System Design (KPM I)** - Kanban University
